Technologies: Github, Web API, Third-Party API, Server-Side API, Moment.js, Node.js, Express.js, MySQL
Web Development Concepts: Mobile-First Development, Responsive Design, Dynamic Development, Test Driven Development, Object-Oriented Programming, Object-Relational Mapping, Model-View-Controller, Progressive Web Applications

PROJECTS

Assassination: Between Two Kingdoms | github.com/jeremy0anderson/shiny-octo-chainsaw | assassination-multiplayer.herokuapp.com/home/

- This application supports a multiplayer, in person social game with all instructions, cards, and conditions built into a web application for easy play and distribution.
- As the lead front-end developer on the project, I built out the initial theme and look of the site, integrated handlebars and Bulma to help with scalability and integrate work from different developers, and created the Express HTML GET routes.
- Technologies used: HTML5, CSS3, Handlebars, Bulma, JavaScript, Node.js, My SQL, Sequelize, bcrypt.js, Express.js, Web Socket

Brain Food | github.com/lillylav/brain-food | lillylav.github.io/brain-food/

- This application uses Web APIs to help users find new podcast and book content by keyword or category and saves recent searches to local storage so you can recall recent results.
- As team lead of a group of 5 developers, I assigned tasks, managed deadlines, scheduled meetings, provided support, and managed the Github. As a developer, I created the function to call the Apple iTunes Store API, helped with the function to get the results to display on the page, and fine tuned the final look of the application.
- Technologies used: HTML5, CSS3, Bulma, JavaScript, JQuery, Web APIs, Local Storage

Weather Dashboard | github.com/lillylav/weather-dashboard | lillylav.github.io/weather-dashboard/

- This application uses Web APIs to provide current weather data and a 5-day forecast for user-searched locations world-wide and keeps recent searches for easy recall.
- As the sole developer of this project, I built the HTML5 framework, designed it using CSS3 and Bulma, and used JavaScript to pull data from the Web API, dynamically display that data on the page, and save recent searches to clickable buttons.
- HTML5, CSS3, Bulma, JavaScript, JQuery, Moment.js, Web APIs, Local Storage

- This application introduces me, displays my work as a developer, and provides my contact information. If you select the "Resume" button in the navbar you'll find a detailed resume with a summary, education, and work history.
- For this project, I created the HTML5 and CSS3 for my portfolio from scratch initially then later refactored the code to include some Bulma styling.
- HTML5, CSS3, Bulma

EXPERIENCE

Outbound Specialist   2016 – Present
SSA Marine   Draper, UT
SSA Marine is the last American-owned stevedoring company operating terminals along the West Coast of the U.S. As an Outbound Specialist I work with SSA's customers to put together accurate numbers and information for export containers loading out on vessels.
Required skills include: multi-tasking, prioritizing tasks, problem solving, pig picture thinking, flexibility, and developing professional relationships.
Key Accomplishments:
- Learned all of the jobs in the department, able to provide back-up coverage for 10+ employees
- Recognized by customers, terminal management, stowage, and local management for my organization, reliability, accuracy, diligence, and teachability
- Employee of the Month February 2019 (link)

Internship as Editor-in-Chief of *Intersections: A Student Journal of Integrated Studies*   Fall 2016
Utah Valley University   Orem, UT
As editor-in-chief of the journal, my main responsibilities were: creating a timeline for accomplishing the project, managing student staff, holding deadlines, managing a budget, scheduling events, creating awareness on campus for submissions, recruiting, and events through digital signage, coordinating with advisors, printers, and campus event staff, and, ultimately, taking a student journal through production: submissions, selection, editing, typesetting, design, approving proofs, and distributing the journal.
Key Accomplishments:
- Increased submissions by 50%, attracted more staff, and provided a better turnout at events by maintaining campus awareness through consistent digital signage
- Advisor's Letter of Recommendation (link)

Media Services Technician II   2014 – 2015
Utah Valley University   Orem, UT
As a Media Services Technician, I helped build out the hardware for classroom, conference room, and event space technology systems, helped to maintain and upgrade existing systems, and helped to provide training and support to users of those systems.
Required skills include: translating technical language for laymen, being teachable and open to feedback, being self-directed and self-motivated, and troubleshooting.

EDUCATION

Full Stack Web Developer Boot Camp Certificate
University of Utah Professional Education | Salt Lake City, UT
A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Firebase, Node.js, MySQL, MongoDB, Express.js, Handelbars.js, and React.js.

Bachelor's of Science in English with an Emphasis in Writing Studies
Utah Valley University | Orem, UT

Associate's of Science in Psychology
Salt Lake Community College | Taylorsville, UT
